

ADDITIONAL INFORMATION FOR THE YELLOW HIGHLIGHTED TRACTS

Gladwin County (Sec. 11): Adjoining this tract to the North and East are several deep Praire De Chein Formation wells.

Montcalm County (All): These minerals were all producing from deep, oil rich, formations with great production. The operator was new and all of a sudden, for whatever reason, plugged the wells and walked away never to be heard of again. I believe there is still a lot of oil at the bottom of these wells. Just needs someone to come along and develop these wells again.

Oscoda County (Sec 16): Adjoining this tract to the North are many Traverse Limestone Formation oil wells.
